

Oratorical Contest Here Tuesday Night

All Local Contestants Will be Heard
At The School

Word has been received that the oratorical eliminations for Redcliff will be held on Tuesday evening next week. Those taking part from Redcliff school are Francis Busholtz, Norma Ross, Tom McKeown, and Billy Sellheim.

The subject upon which the pupils are to talk is "Canada's Future," and, according to the rules of the contest, each child must prepare his and her own material. They are allowed to secure their information from any source, but must put it in their own language. Any whose paper is prepared for them will be declared from the contest.

The winners of the contest here on Tuesday will speak against the winners in Medicine Hat.

The local contest will take place in the school, "Truster, R. C. Hargrave and Mr. F. Bickel, together with one from Medicine Hat, will be the judges here next Tuesday evening.

Great interest is being taken in this contest throughout the province, and at here are anxious those a Redcliff pupil in the final.

An invitation is extended to parents of high school pupils, the School Board and town officials to be present on Tuesday evening to lend their encouragement to the youthful contestants. A profitable evening is assured.

Test Rate on Alberta Coal For 3 Years

Mattee Now in the Hands of the
Railway Commission

Negotiations with Railway Commission well advanced, it is understood, for the establishment of a three year test rate on the movement of Alberta coal to central Canada.

Official announcement in the matter is likely within the next few days.

Pending the official announcement the details will not be available but, according to report, the scheme will probably be on the basis of a three year test rate of \$6.75 per ton, established by order-in-council. The rate would be applicable over a period of at least three months in each of the three years.

Following the application of the rate the Railway Board would investigate the actual cost of the movement. Any loss to the railroad company would then be met by an appropriation in the supplementary estimates.

BOWELL NEWS

Mr. Schneider loaded a car of wheat this week.

Olson Bros. are at present threshing at Mr. Pincant's.

Mrs. Delphine, Evelyn and Madge spent Saturday with Mr. and Mrs. H. Dickson at the Harvest Vale district.

Miss Irene Lapp spent Sunday with Mr. and Mrs. R. S. Fether.

Quite a number of Bowellites enjoyed skating on the Bowell rink during the week end.

Mr. A. B. Olson is at present, staying in Bowell.

Quite a number of changes are expected in farm lands this spring, both by sale and lease.

Mr. Flydy Burk has purchased the Burk homestead, s. v. 14-6-4.

Mr. Viken is at present loading a car of wheat. He had a very successful harvest the past season.

DREAMLAND THEATRE
HAS ROOF GIBSON

Movie goers who are "thrill hunters" will get a "1928 proof" kick out of Hoot Gibson's movie, "Startling Evidence." The "Beverly Hills" Universal and Western production which opens at the Dreamland theatre, Medicine Hat, Thursday. It has everything to hold the attention, thrills, pathos, comedy, human interest and a pleasing love story.

By-Election Held Here Next Month

Premier Stettin Will Be Issued
At Class Session

Premier J. E. Brownlee said Friday that the government would issue the writ or by-election in Medicine Hat immediately after the present session of the legislature prorogues which will be on or about March 16 or 17 next. The law provides that the election be held within 30 days after the writ is issued, which will bring the by-election here some time in April.

The election will fill the vacancy caused by the death of the late Chas. S. Pingle, Liberal.

RADIO PROGRAM ON OFFFELLOWSHIP, MARCH 23

A one hour radio program, devoted to Offfellowship, will be given by station K. M. A. of the May Seed Nursery Co. of Glenora, Iowa, from 7:30 to 8:30 p.m. central standard time, on Friday, March 23rd.

The Grand Master of Iowa, Missouri and Nebraska will direct the program on that date, assisted by Redcliff assembly officers at the same jurisdiction. Grand Master Billingsworth of Iowa, however, may also appear on this program.

LEGISLATURE MAY ALSO LIMIT SPEECHES

Falling into line with the procedure of the federal house, the committee of rules of the Alberta legislature has brought in a report recommending the following points:

Adoption of the clause rule. Limitation of all speeches except group or party leaders to forty minutes; a minister moving a government order is excepted from the rule as also a member speaking in reply immediately after a minister, or a member making a motion or a minister replying thereto.

ADDITIONAL LOCALS

Poor Mr. Cook, getting a wifely visit great unless John has all fun, Come and see at Gordon Memorial Mar. 22

Howard Krets has secured a good position with Boney time, in the garage in Medicine Hat.

Walter McChary leaves tonight for Calgary to fill an engagement to sing over the radio this week end.

A slight flurry of snow and a little drop in the weather reminds us that it is not spring yet.

The address on Sunday evening in Gordon Memorial church, "Africa and Her People," will be illustrated with beautiful colored pictures.

Owing to the absence of the Rev. the regular monthly meeting of the local League will not be held next Sunday. I will hold the Sunday following.

Remember the play, "Wanted A Wife," at Gordon Memorial church on March 22nd. Come and see how Mr. Cook looks when his great uncle, John leaves him \$100,000.

The concert arranged by a few members of Gordon Memorial A. F. and held in the church last Monday evening, went off quite successfully.

The ladies in charge experienced a few anxious moments during the early part of the evening because several of those who were to have contributed numbers, were unable to do so.

The concert, arranged by a few members of Gordon Memorial A. F. and held in the church last Monday evening, went off quite successfully.

JOHN WELLS FOUND GUILTY OF ASSAULT

John Wells, of Redcliff, was found guilty of assault by the Supreme Court in Medicine Hat last Monday afternoon, and fined \$25.00 or one month's imprisonment in default of payment. Wells was bound over to his own recognizance of \$500 to be of good behavior for one year. Mr. Justice Walsh pointed out that no matter what provocation occurred he must not go so high to take the law into his own hands. This case arose out of an argument between Wells and H. Van Werts at a dance here a few weeks ago, which ended up with Wells hitting Van Werts, inflicting a nasty wound on his face. The case showed a warning against resorting to blows to settle an argument.

MEDICINE HAT HOCKEY TEAM IN FINALS

By defeating Carleton in both games in Medicine Hat this week, the Medicine Hat hockey team of that city won their way into the finals in the provincial championship. The Medicine Hat team now have to play Golden in the finals. One game will likely be played in Golden on Saturday and the second one in Medicine Hat next Monday.

NO REDISTRIBUTION AT THIS SESSION

Redistribution in Alberta, at revision of the electoral voting system will not be dealt with this year by the government but will be put over until next session of the legislature when adoption of the country system will be considered at the same time.

Football Club To Hold Social

To Be Held in Cliff Hat—Progressive
Whist and Dancing

Tickets are now out for the big whist drive and dance to be held in Cliff Hat on Friday evening March 9th, under the auspices of the Redcliff football club. These may be secured from the following members of the committee in charge: Messrs. O. Davison, J. Leaky, W. Willis, E. Martin, D. Phillips, and N. Willis.

Good prizes are being offered for the whist drive and the best music available secured for the dance. Refreshments will be served during the evening. Admission \$1.00 a couple, extra ladies free. Be sure to secure a ticket and thus help the football club.

USE OF IMPROVED SEED GRAIN URGED

The use of better quality seed grain by farmers throughout the province this spring is being urged in order to maintain the high standard which Alberta crops have established in the past. Lack of care in the selection of seed, with the consequent lowering in the quality of the crop produced, will very soon reduce the demand for Alberta wheat on the markets of the world and correspondingly lower the price received by the grower.

There is no question but that the fastest cause of Alberta's loss of revenue this year by a vast sum if the farmers could only be induced to plant better seed grain. The three prairie provinces last year shipped four million bushels of seed to the land of the lakes. This was largely seed of which Alberta furnished her share and the quantity is undoubtedly increasing very rapidly each year. This dockage is largely controllable.

The use of better quality seed grain by farmers throughout the province this spring is being urged in order to maintain the high standard which Alberta crops have established in the past.

Interesting Lecture On The Prayer Book

Given by Mr. Cooper in Parish Hall
On Monday Evenng

Rev. J. L. Cooper's lecture on the development of the Book of Common Prayer, delivered in the Parish Hall on Monday evening, was much appreciated by those present. In it he detailed the origin of forms of prayer from the sub-apostolic age onward, and explained the reason for the establishment of the Latin language as the ecclesiastical tongue of the west. He then stated the cause, why the Prayer Book in English was so long in appearing. First the widespread illiteracy of the country over many centuries, few but priests and monks being able to read and write. Second, the toil and expense of producing books before the invention of printing, and finally the slow development of the English language itself into a literary medium. He went on to describe the pre-reformation service book from which the Prayer Book was mainly compiled, and to enumerate the several editions of that book, to be found in the national archives, viz. J. I. the restoration of the Bible to its place in church worship, which it had to a great extent lost; J. II, the publication of the Book of Common Prayer in 1549; J. III, the revision of the Book of Common Prayer in 1562; J. IV, the revision of the Book of Common Prayer in 1662; J. V, the revision of the Book of Common Prayer in 1662; J. VI, the revision of the Book of Common Prayer in 1662; J. VII, the revision of the Book of Common Prayer in 1662; J. VIII, the revision of the Book of Common Prayer in 1662; J. IX, the revision of the Book of Common Prayer in 1662; J. X, the revision of the Book of Common Prayer in 1662; J. XI, the revision of the Book of Common Prayer in 1662; J. XII, the revision of the Book of Common Prayer in 1662; J. XIII, the revision of the Book of Common Prayer in 1662; J. XIV, the revision of the Book of Common Prayer in 1662; J. XV, the revision of the Book of Common Prayer in 1662; J. XVI, the revision of the Book of Common Prayer in 1662; J. XVII, the revision of the Book of Common Prayer in 1662; J. XVIII, the revision of the Book of Common Prayer in 1662; J. XIX, the revision of the Book of Common Prayer in 1662; J. XX, the revision of the Book of Common Prayer in 1662; J. XXI, the revision of the Book of Common Prayer in 1662; J. XXII, the revision of the Book of Common Prayer in 1662; J. XXIII, the revision of the Book of Common Prayer in 1662; J. XXIV, the revision of the Book of Common Prayer in 1662; J. XXV, the revision of the Book of Common Prayer in 1662; J. XXVI, the revision of the Book of Common Prayer in 1662; J. XXVII, the revision of the Book of Common Prayer in 1662; J. XXVIII, the revision of the Book of Common Prayer in 1662; J. XXIX, the revision of the Book of Common Prayer in 1662; J. Filling Up Vacant Spaces

25,000 New Colonists Added To Canada's Population In 1927

Through C.N.E.

Approximately 55,000 new colonists were directly added to Canadian population in 1927 through the instrumentality of the Department of Colonization and Development, Canadian Pacific Railway. Of these roughly 25,000 moved directly through channels created by the Department into agricultural or domestic service, farm training or farm ownership. Settlers moved from the United States by the Department's organizations totalled 15,000, practically all of which are established on farms.

FOUND A HEALTH

BUILDING TONIC

A Nova Scotia Lady Was In An Anæmic Condition

Mr. and Mrs. J. H. Sainsbury, of Nova Scotia, who do not sleep well and are not refreshed and strengthened by a night's rest, are among the many who find that the building tonic, Dr. Williams' Pink Pills, from first dose to last they find the strength and energy and in this way promise better appetite, better sleep at night, and renewed strength.

Mrs. Mary R. Sainsbury, of Nova Scotia, writes: "I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know. I was in a very poor state of health, and reached the stage where I had to go to bed. A doctor was called in, but he and I had our own troubles, but was simply run down from overwork. I was left with a family to support, which I did by doing housework, and he told me my blood had almost turned to water, and I had a red cross. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning, and before very long I was able to go out on my duties as usual again. This was a few days ago, and my health is now good until about a year ago, when I broke out with hives of the blood. As soon as I commenced the pills, my blood had become so thin that it had really solidified itself. I told him I had bought several boxes of Dr. Williams' Pink Pills, and he told me to stop taking them as he thought they were just what I needed. I took eight more and again was in good health. I can therefore recommend them with all my heart to anyone who is in a weak or run-down condition."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of 50c per box. Try them too.

Has Firm Foundation
Sometimes visiting the progress of our next-door neighbor, Canadians have felt discouraged. The United States was moving ahead so rapidly, and Canada's progress was apparently so small. It is true that our rate of advancement has not been so rapid, but we have been building on a firm foundation and we are now in a position to reap the benefits. The next ten or fifteen years should see a development that will bring joy to the hearts of every Canadian.

Mr. Williams' Pink Pills will eradicate the worms which are so common in children and are believed to cause many diseases. They are an acceptable medicine to children and can be safely relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthy conditions. They are an excellent remedy for these ills.

In New York City alone it is estimated that 100,000 women daily have their hair marcelled.

The most common mistake in mixing concrete is too much water per unit of cement.

Miller's Worm Powder will eradicate the worms which are so common in children and are believed to cause many diseases. They are an acceptable medicine to children and can be safely relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthy conditions. They are an excellent remedy for these ills.

World Wheat Pool Conference
Will Be Held In Regina On June 5, 6 and 7

Preliminary arrangements for the third international wheat pool conference were discussed at a meeting of the international conference committee held here in Winnipeg recently.

The conference will be held in Regina, June 5, 6 and 7, and it is expected all the important wheat exporting countries of the world will be represented.

No statement was made concerning the preliminary plans discussed recently, but it was announced the committee would meet again in May to arrange final details.

Alberta Cattle For U.S.
According to figures compiled by the United States Cattle Raisers' Association, Calgary, more than \$500,000 worth of cattle from Alberta was exported to the United States between July 1, 1927, and November 30th. Approximately 22,000 head of stockers, feeders and butcher cattle were shipped, some 1,400 being involved through Ledeburg.

Radio Telephone Links

Winnipeg and London

Conversation Carried On Between Western City and Mother Country

Linking up the gateway of Western Canada with the mother country, a trans-Atlantic radio telephone conversation between Winnipeg and London, England, has been successfully carried out. For 15 minutes an official of the Manitoba Government Telephone System conversed with a member of the London press telephones. So clear was the reception that the London official complained of the lap-lap of the telephone link in the Winnipeg office.

"For heaven's sake stop that telephone tickler in your room, it is deafening," he said to William Walton, long distance chief of the Manitoba telephones.

The call as it came to Winnipeg, a distance of about 5,000 miles, passed through New York, Chicago, Minneapolis and Fargo, N.D.

Two Trophies For Aviation

Awards For Greatest West Of 1927

Two important aviation trophies for the aviators considered to have done the greatest feat of the year 1927, exclusive of training, are to be awarded.

One is being given by the Department of National Defence and the other by the International League of Aviators. The latter trophy is accompanied by a cash prize enabling the winner to take part in international aeronautic events. The aviation League of Canada is charged with the choice of the winner.

The name of Captain F. Stevenson, former pilot of the Western Canada Airways, who attained the highest 6,000 feet flying last year is mentioned in connection with the government trophy. Captain Stevenson was killed recently near The Pas, Man., but it is believed a posthumous award would be in order.

For Seals or Bears.—Dr. Thomas' Eucalypti Oil is a standard remedy for the prompt treatment of seals and bears. His healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all kinds of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable means many a doctor's and veterinarian's fee.

Good Market For Milk Products
It is estimated that the production of milk and milk products in Canada in 1926 amounted to \$200,000,000 per annum at the present time. The prospects of two markets for Canadian products, the old established one in Europe and the new one in the United States, makes the outlook for the industry decidedly rosy in the opinion of the Dominion Dairy Commissioner.

It Bids Pain Begone.—When neuralgia strikes the nerves, Dr. Thomas' Eucalypti Oil is the surest remedy. Oil rubs in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

The total crop of corn of the South American countries for last year exceeded 75,000,000 pounds.

More than three-fourths of the corn harvest raised are consumed by the native Indian population.

Canada To The Fore

Canada's amazing progress in the last few years is challenging the attention of the world. That progress is based not only on the great variety, extent and richness of this country's natural resources, but is founded in the renewed faith of Canadians in their Dominion and in the confidence they have in themselves, a faith and confidence born largely of the really tremendous achievements of Canada during the years of the Great War. In many things struggle the people of Canada showed wonderful energy, displayed great initiative, unsurpassed organizing ability, and hitherto undreamed of power and strength. Thrown to a larger extent upon its own resources, financial and otherwise, the Dominion courageously faced all problems and did not permit marked success.

For countries, if any, weathered the stormy days and difficult conditions of the after-war and reconstruction years as successfully as did this Dominion, Canadians became conscious for the first time of their national strength; the people discovered their national soul. Their former doubts and uncertainties, their self-doubts, and their lack of confidence in their own inferiority complex, disappeared, and has been replaced by courage, confidence and superb faith.

In former years, in fact, Canadians had successfully grappled with large and difficult domestic problems, but, in these more recent years, the Dominion has boldly taken its place in the world arena. Its position today in the Council of the League of Nations is an outstanding one, its place in the Commonwealth of British Nations is strong, and assured. The more or more nations constituting the Pan-American Union, including the United States and the countries of Central and South America, are anxious that the Dominion should join this great league of nations and be a part of the Union, while other nations are encouraging the establishment of direct diplomatic representation with this country.

But even yet it is doubtful if many Canadians fully realize the rapid growth and steadily increasing power of their own country, because, as a rule, the average citizen pays little attention to so-called dry statistics in which the growth of a country is set forth. In a recent speech at Winnipeg, Mr. R. W. Beatty, president of the Dominion Farmers' Union, said that the growth of a few facts, which will bear repeating. He noted, for example, the following:

Every working day last year Canadians took from their forests, products valued at \$1,500,000.

From mines they took \$250,000 daily.

Every working day they increased their capacity for manufacturing pulp and paper by 1,000 tons. Canada now manufactures one-third of the world's requirements of newspaper.

Every working day they added 700 horsepower in hydro-electric energy to the power already installed, and at the same time began work that will add 1,000 h.p. every day in the first six months of 1928.

Canada's export trade last year, with less than 10,000,000 people, was equal to the export trade of the United States, when the latter country had a population of 75,000,000.

Commenting on these and other statements in Mr. Beatty's striking survey, a Winnipeg paper says: "It is a wonder that in the past two years the Canadian people have been getting \$200,000,000 into the savings banks every banking day, increasing deposits in other financial institutions correspondingly, investing in life insurance at the same relative rate, buying back millions in securities formerly held in Great Britain and Europe, pouring an almost unlimited capital for sound industrial enterprises, and have acquired a spirit of self confidence and self-reliance."

Now it is surprising that more people are emigrating from the British Isles to Canada than to any other country, many thousands more than to Australia.

Speaking at the opening of the 5,000,000 bushel terminal elevator just completed by the Canadian Grain Corporation at Port Arthur, President T. A. Cresser predicted that, while Canada was now producing approximately 500,000,000 bushels of wheat annually, and in today's world's greatest wheat exporting country, production would be further increased until this Dominion would be producing one billion bushels of wheat annually.

And the thought for Canadians to keep ever in their minds, and to profit by, is that Canada is only just beginning to get into its stride.

Suggests Cure For Criminals
Physician Would Combat Crime By Use Of X-Ray

A sentence of "under the ray" instead of the gallows or a drab jail would be useful not to criminals if a group of Winnipeg physicians made practical their theory of combating crime through the medium of the X-ray.

The experimenters, headed by Dr. P. J. Hargrave, have revealed that for some time they have studied a method consisting of dissolving the thymus gland with the X-ray.

Dr. Hargrave said their work tended to show there is a certain gland near the throat of small children which should vanish as the child grows up. If they found it in many criminals and insane persons, it is their theory

that this ductless gland causes some persons to be abnormal and that the trouble can be eradicated with the X-ray.

After studying the faces of Nathan Leopold, Richard Leach and others, Dr. Hargrave said he found in all of them the tell-tale characteristics of gland cases.

Only the uniformed endure the agony of colic. The hawking song of yellowy's Carr Remedy and get relief.

World Wheat Pool Conference
Will Be Held In Regina On June 5, 6 and 7

Preliminary arrangements for the third international wheat pool conference were discussed at a meeting of the international conference committee held here in Winnipeg recently.

The conference will be held in Regina, June 5, 6 and 7, and it is expected all the important wheat exporting countries of the world will be represented.

No statement was made concerning the preliminary plans discussed recently, but it was announced the committee would meet again in May to arrange final details.

WORLD HAPPENINGS BRIEFLY TOLD

A contract for construction of a grain elevator has been let by the New Westminster Harbor Commission. The cost of the elevator will be about \$500,000.

The establishment of a department for the promotion of peace and international understanding is advocated by Miss Agnes MacPhail, Progressive, Southeast Grey.

C. C. Dunning, Minister of Railway, introduced in the House a bill to provide for the construction of a line of railway between Inverness and Bullgoun, Alberta.

Patrick Murphy, aged 44, was added to the list of victims in Winnipeg when he was found dead in a bed in a rooming house, as the result of drinking wood alcohol. He is the 13th victim within the past two months.

Dr. Albert Gordon was chosen president of the National Council of Canada, Institute of International Affairs, at the first annual meeting held in Ottawa, Feb. 10. Dr. Gordon, Winnipeg, was elected vice-president.

Professor Johannes Fibiger, winner of the Nobel Prize for medicine in 1926, died recently at Copenhagen. Professor Fibiger, who was on the faculty of the University of Copenhagen, was awarded the prize for his work in cancer research.

The scope of treaties arrived at by the Pan-American conference held in Havana, Cuba, has been widened to include instead of the U.S. and two Latin American republics. The treaties involved are those dealing with commercial aviation.

Admirers of many nationalities attended the funeral of Viscount Blanes, noted British author, who died at Mentone, France, in voluntary exile. A company of Alpine chamois, the famous blue devil, rendered military honors.

Krupps Are Kept Busy

Makers of War Material Find Profit in Peace Time Products

In shifting from the manufacture of cannon and war materials to the making of such peaceful articles as false teeth, typewriters, vacuum cleaners, the Krupp Works, at Essen, have made a paying change.

The annual Krupp report shows a net profit of 13,000,000 marks—about \$2,000,000—compared with a deficit for 1926 of 2,000,000 marks.

The Krupp Works, so recently famous throughout the world as purveyors of munitions of war and heroes of the production of weapons in tremendous quantities, have accomplished readjustment to peaceful productivity with extraordinary rapidity.

Almost the same day and night activity prevails in its days before the world war, but today the works are filling orders for railway locomotives and parts for motor cars, haulers, tractors, knives and forks, cutlery, artificial teeth, mounted on a platinum-like steel alloy and a hundred and one other such commodities of peace-time worth.

Some scientists think that the rings around the planet Saturn are composed of large masses of dust particles.

Britain Is Following

Disarmament Plan

Have Decided To Abandon 10,000-Ton Vessels For The Present

The British Government, it was announced at the tripartite conference, still further in its policy of naval disarmament indicated after the failure of the tripartite conference.

The building program passed in 1925 provided for the laying down of one 10,000-ton cruiser and two 8,000-ton cruisers in each of the three years, 1927, 1928 and 1929. The First Lord of the Admiralty, Lord T. W. C. Bridgeman, recently announced that it had been decided to abandon all the 10,000-ton vessels for the present and that one of the projected 8,000-ton ships might be carried over until 1929-30. Now it has been determined to abandon the latter vessel altogether.

The net result is that in the two years in question only three 8,000-ton vessels will be laid down, instead of four in this class, as originally proposed. Together with the elimination of the 10,000-ton ships, this will mean the saving of about £5,500,000 (£27,500,000). It is understood that the program for destroyers and submarines will remain unchanged and that construction of mine destroyers and six submarines will be included in next year's program.

The net result is that in the two years in question only three 8,000-ton vessels will be laid down, instead of four in this class, as originally proposed.

Together with the elimination of the 10,000-ton ships, this will mean the saving of about £5,500,000 (£27,500,000). It is understood that the program for destroyers and submarines will remain unchanged and that construction of mine destroyers and six submarines will be included in next year's program.

HOW IT IS IN DENMARK

What That Country Has Accomplished Within Recent Years

It has been said of Hon. J. B. Martin, Ontario minister of agriculture, that he cannot understand an author without talking about Denmark. Try as he may he cannot do it. Those who go to him will find him waiting for him to get going about the Danes.

And no wonder. No minister of agriculture in this province could be better equipped for the "in-felling" of farmers who the Danes have done and how they have done it.

Madison-Wegelin, premier of Denmark, has been telling the world in print something of what his country has accomplished within recent years. Denmark has now more cows per hundred inhabitants than any country in the world, 42 against Holland's 15, Germany's 16, and England's 10. Denmark's pigs number 85 to Germany's 55, and England's 5.

Nearly 90 per cent of Denmark's exports are products of animal origin—120,000 tons of butter, 300,000 tons of eggs and 200,000,000 eggs come from a population of three and a half million, only 20 per cent of whom live by agriculture.

The prosperity is based on the fact that the farmers of Denmark have combined of the fifty of growing and accepting credit, and the close organization of farmers for products to produce butter, bacon and eggs. Denmark imports more coffee than any other country.

The prize minister also tells of the success that has attended the extending of co-operative credits, and the close organization of farmers for products to produce butter, bacon and eggs. Denmark imports more coffee than any other country.
